

Dear Dino,

Last month we told you about course updates for several of our courses. This month we'd like to let you know about some updates to our science and information technology courses that give students greater choice, flexibility and support.

We're offering more majors, minors and award specialisations, practical hands-on industry experience and a flexible mix of online and on-campus study.

Course changes in science and information technology in 2022 (subject to Academic Board approvals):

- Bachelor of Agriculture has had a name change and now has early exit points with the Diploma of Biological Sciences or Associate Degree of Agriculture
- Bachelor of Cybersecurity can be taken as a double degree with commerce, criminology or psychological science. Our new Diploma of Information Technology can be used as a pathway option to cybersecurity
- Bachelor of Information Technology students at the Melbourne campus can now choose from six majors aligned to future industry growth in either: software engineering, cloud analytics, artificial intelligence, network engineering, information systems or data science. Our online version of the course offers greater flexibility including software engineering and cloud analytics as available majors. Students can opt to graduate sooner with a Diploma of Information Technology or Associate Degree in Information Technology
- Bachelor of Science students can choose from up to 17 majors (depending on the campus), including new offers such as climate change, cybersecurity and artificial intelligence. There are also options to graduate sooner with our Diploma of Science and our Associate Degree in Science.

More entry and exit points mean more pathway opportunities and the chance to graduate with a Diploma after just one year of study.

Our 2022 Pathways Guide is coming soon to support you guide your students.

Parade College shares their Aspire success

Career Practitioner, Vivian, shares what it is about the Aspire program that encourages their students to get involved with over 100 applications already submitted this year.

Simplified process for scholarship applications

As of 2021, La Trobe scholarship applications have moved to VTAC. Students now only need to fill in one form to apply for equity and access scholarships and bursaries.

The [Regional Benefits Program](#) scholarship will automatically be applied for eligible students when they enroll at a regional La Trobe campus. The Regional Benefits Program supports high achieving students to study, live and thrive in regional Victoria.

Scholarship applications are open from 2 August – 8 October 2021. For full details on how to apply [visit VTAC](#).

For other scholarship opportunities, including those provided by La Trobe and external philanthropic organisations visit our [Scholarships](#) site.
