

Updated: La Trobe Bachelor of Business
More flexibility – More majors – Choose your future degree

Dear Stephanie,

Do you know a student that is an innovator? Are they destined to create a start up or work for one of the world's top 100? Then our new Bachelor of Business could be the kickstart they need.

Our [Bachelor of Business](#) is making it easier than ever for students to focus on the career they want. With a range of enhanced course options, they'll find majors and minors that let them specialise in a chosen field, from events management to marketing, sports management, tourism and more. And what's more, they'll even graduate with that major on their transcript recognising them for their major, like Human Resource Management or Economics as an example.

This means that students will be able to graduate with an edge and the skills employers are looking for. They'll also benefit from real-world experience with industry leaders and La Trobe partners to launch an exciting career. There are also options to study online with tailored support.

[Aspire applications are closing soon >](#)

So far over 950 students have received a conditional offer with more on the way. All applicants will receive a response by early October. In the meantime, students can access hundreds of free VCE and HSC revision guides with the Aspire Advantage.

New health course for 2022

Healthcare is underpinned by information, but who manages it all? Operate from behind the scenes in the [Bachelor of Health Information Management](#).

Our new course combines the clinical and business side of healthcare and covers areas like clinical coding, classification, data analytics and health system management.

Students undertake placement in each year of the degree, so they graduate with hands-on experience.

In 2022 this course is offered at Melbourne (Bundoora) campus, online or a combination with [StudyFlex](#).
