1300 135 045

Hi Hammad,

It's almost time to farewell another year. Congratulations on the achievements of 2021, after another challenging year in education.

Before we get to the end of the year, we know that students will want to revisit their preference list one last time before locking it in for the main round offers.

At La Trobe, we know that students are more than a number, and we want to share with you our commitment to support your students to make informed decisions, and to support you as career professionals.

For that reason, we're offering a suite of [webinars and extended opening hours](#) to assist throughout the Change of Preference period.

[Join our webinars](#) on **16 and 17 December** to discover discipline specific information, and pathway options. In addition, we'll discuss options for students that did not meet a prerequisite, or opted to complete an unscored VCE or VCAL in 2021.

For more advice, call our friendly team of experts on 1300 135 045. No matter how big or small your question, we're here to help.

New Diploma of Engineering Technology

Our new diploma provides an immersive introduction to the field of engineering and a pathway to one of two world-class engineering degrees. This adds to the suite of new diplomas introduced by La Trobe University.

Undergraduate packaged offers available in 2022

La Trobe's undergraduate packaged offers provide students an alternative pathway to a Bachelor's degree. Students can add the packaged offer to their VTAC preference list, so while they study the Diploma, their spot in the Bachelor's degree is locked in.

Prepare Accelerate – summer pathway program

Over summer, we'll be running a special version of our Prepare program, called Prepare Accelerate. If a student undertook VCE/HSC unscored, or didn't get the ATAR they were aiming for, Prepare Accelerate is here to get them back on track to start uni in Semester 1, 2022.

Students complete 3 micro subjects from **3 January to 15 February**, taught entirely free and online in a supportive environment. We'll use their average grade to calculate a La Trobe Entrance Score for admission to our Diploma and Bachelor courses.

Future rural doctors take bold new step

Our first cohort of students in our end-to-end rural medicine program – the Bachelor of Biomedical Science (Medical) at Bendigo and Albury-Wodonga have graduated. The partnership established between La Trobe and the University of Melbourne in 2019 was designed to help solve the rural doctor shortage.

Law student wins prestigious scholarship

La Trobe student and Aspire recipient Hannah Gandy will study law at University College London after winning the prestigious John Monash Scholarship. Last month Hannah was a finalist for another esteemed award – the Rhodes Scholarship – and also received a scholarship from the Order of Australia Association Foundation in 2019.

Master of Teaching graduate shares his journey

Jarett Boorn graduated from Bendigo Senior Secondary College in 2015, achieving an ATAR of 97.2 and receiving a top science student award – all while caring for his mother, who lives with an acquired brain injury. After completing a Bachelor of Science and then Master of Teaching at La Trobe, Jarett landed his dream job as a physics and maths teacher at BSSC earlier this year.

“It was always my plan to go into teaching, but I wanted to complete a science degree first to build up my knowledge as much as I could. Science has always been my passion, and I love teaching. There’s a shortage of science teachers, especially in regional areas, so it’s great to be doing something I love while helping the community.”
